-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 June 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

R s p o n s t o A m e n d m e n t

1. The present Office action is made in response to the Amendment (Paper No. 14) filed on 12/17/2001 and the communication filed on 06/24/2002.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 is rejected under 35 USC 112, first paragraph because the disclosure, as originally filed, does not provide support for the feature of an LED having a ***single light discharge opening*** as recited in the newly-added material to the claim, on line 7.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2872

5. Claim 1, as best as understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Qiao et al (U.S. Patent No. 5,485,291) in view of Tai et al (U.S. Patent No. 5,668,913).

Qiao et al disclose an edge light for panel display. At columns 2-3 and in figures 2-3, the device comprises a light source system (32) for providing light, a light guide (12) having a front surface (13) facing the light source system, a light discharge surface (21) facing the display panel (31); a reflecting surface (22) disposed opposite the light discharge surface (21) facing a reflector (26) which is disposed parallel to the reflecting surface (22); a rear surface (14) located opposite the front surface (13) wherein the rear surface (14) faces a reflector (28). The discharge surface (21) and the reflecting surface (22) are disposed in a parallel manner. The light reflecting surface (22) comprises a plurality of grooves each has a front side (23) and a rear side (24). Since the angle formed by the front side (23) and the light reflecting surface (22) is in the range of $(1^\circ, 15^\circ)$ and the angle formed by the rear side (24) and the light reflecting surface (22) is in the range of $(35^\circ, 55^\circ)$; therefore, the angle formed by the front side (23) and a line perpendicular to the light discharge surface (17) is in the range of $(75^\circ, 89^\circ)$ and the angle formed by the rear side (24) and a line perpendicular to the light discharge surface (17) is in the range of $(35^\circ, 55^\circ)$. The light rays from the light source (32) passing through the front surface (13) of the light guide (12) will have a part of light rays being reflected by the front side (23) of each groove towards the display panel (12) as can be seen in rays (30a) described in column 3 and

fig. 2., and other light rays which are not reflected by the front side (23) of the groove will be guided by the light guide (12) to the rear end (14) and then those light rays are reflected by the reflector (28) to return to the light guide and reflected from the facets (24) to illuminate the display (31). As such, the display panel is illuminated by both light rays reflected by the front side (23) and the rear side (24) of each groove formed on the reflecting surface (22). With regard to the light source system and its position with respect to the light guide, at column 3 (lines 50+), Qiao et al teach that the light source can be light emitting diodes, and the number of light source be used in the system can be a single light source which is disposed at the central position of the front side surface (23) of the light guide (12). See column 3 and fig. 3.

As a result, the system provided by Qiao et al meets all of the features recited in the pending claim except they feature that the grooves are continuously formed in the light reflection surface; however, the arrangement of grooves in a surface in a continuously manner is clearly suggested to one skilled in the art as can be seen in the system provided by tai et al. In particular, Tai et al discloses an optical guide light member having a reflecting surface with a plurality of grooves. As described in column 10 and shown in figs. 3C and 3E, Tai et al disclose that the grooves can be formed continuously in the surface as can be seen in fig. 3C or the grooves are arranged separated from each other as can be seen in fig. 3E. Thus, it would have been obvious to one skilled in the art at the time the invention was made to modify the device provided by Qiao et al by using a

Art Unit: 2872

plurality of grooved arranged in a continuous manner as suggested by tai et al for the purpose of improving the light distribution and/or meeting a particular application.

Response to Arguments

6. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q Nguyen whose telephone number is 703 308 4814. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cassandra Spyrou can be reached on 703 308 1687. The fax phone numbers for the organization where this application or proceeding is assigned are 703 308 7724 for regular communications and 703 308 7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308 0956.
